

Risk List and Feasibility Analysis

Technical Risks

- R1: Lack of experience with POS system architecture.
- R2: Integration challenges between modules (sales, inventory, reporting).
- R3: Data security vulnerabilities.
- R4: Incorrectly scanning of the product or gadget barcode.

Business Risks

- R5: System may not meet stakeholder expectations.
- R6: Budget or infrastructure limitations.

Feasibility Analysis

Technical Feasibility

The project is technically feasible using modern programming frameworks and databases.

Economic Feasibility

Development costs are manageable within the academic project scope.

Operational Feasibility

Store staff can be trained easily due to the system's user-friendly design.
